Special Features Of Manson's Camshaft Tubes

- High quality seamless tubing or high density poly propelene.
- Extends camshaft life for trailers subjected to extreme operating conditions.
- Includes grease fitting - Camshafts last longer as tube holds more grease.

VARIO ROD'S - SELECTION AND ASSEMBLY INSTRUCTIONS

The Mansons Vario Heay Duty two piece torque rods are a premier replacement for on-highway & vocational applications. Vario tube & spacer ends are made for up to 30 inch centres for most application up to 52000 pound capacity.

IF TORQUE ROD BEING REPLACED IS TWO PC VARIO ROD

- Measure the centre to centre distance of the Torque Rod and make the new torque rod with the same length.
- If the distance is upto 27.000 inch – use 10.270 Spacer End + 10.269 Tube End.
- If the distance is in between 27.000" to 35.000" –Use 10.268 Spacer End + 10.269 Spacer End.
- Verify how the Torque rod is mounted. Then measure the Centre to Centre as shown in the figure 1 , 2 & 3.

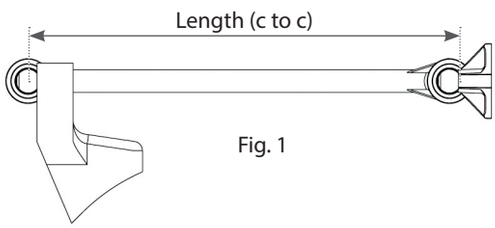

Fig. 1

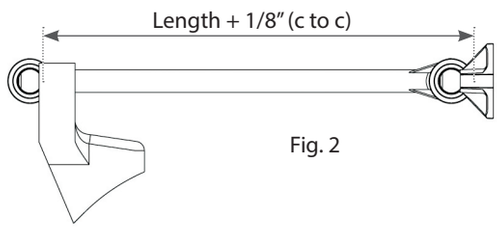

Fig. 2

IF TORQUE ROD BEING REPLACED IS ONE PC TORQUE ROD (OLD ONE)

- Verify how the Torque rod is mounted. Then measure the Centre to Centre as (shown in the figure 1 , 2 & 3.) and 1/8" to make the new torque rod.
- If the distance is upto 27.000 inch – use 10.270 Spacer Rod End + 10.269 Tube Rod End.
- If the distance is in between 27.000" to 35.000" –Use 10.268 Spacer Rod End + 10.269 Spacer Rod End.

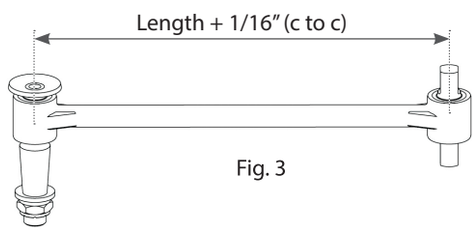

Fig. 3

PRE ASSEMBLY PROCESS.

- Select Appropriate Vario Spacer Rod End and Tube Rod End.
- Assemble Spacer Rod End into the base of the Tube Rod End.
- Excess length from the Spacer Rod End to be removed as per the required length.
- Remove Excess length using Abrasive cutting, sawing or any other machining method.
- Both the Vario Spacer Rod End and Tube Rod End will be free from grease, oil or oxides before welding.

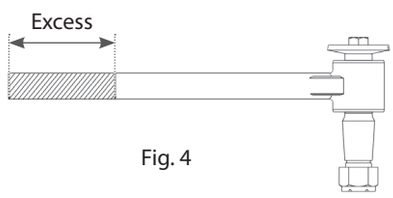

Fig. 4

Manufacturers part numbers and name are for cross reference purpose only and do not imply anything about the origin or manufacture of the product

ASSEMBLY PROCESS

- Assemble Vario Spacer Rod End into the base of the Tube Rod End (Check for the correct length).
- Rotate the spacer end to achieve the required position.

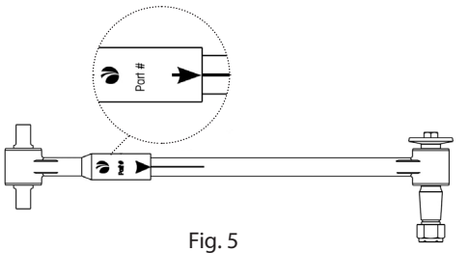

Fig. 5

WELDING PROCESS

- Complete assembly by welding a minimum ¼" convex fillet weld. This weld must obtain full root penetration with equal legs sufficient to provide metallurgical fusion between weld and base metal. Do not under cut or overlap.
- Preferred: GMAW(Gas Metal Arc Welding), commonly referred to as MIG welding or Alternate - SMAW (Shielded Metal ARC Welding), Commonly referred to as stick, arc or coated electrode.
- Current - DC reverse polarity.
- Shielding Gas (GMAW process only) 100% CO2 or 75% Argon-25% CO2(C25) at 30 CHF flow.
- Filler Metal – GMAW-AWS#ER70S-6, SMAW - (Coated electrode), aws#e6010 or E7018

Note: Pre heating and post heating of metal is required. Prior to welding, spacer end should be pre heated within the range of 200 - 400 Fahrenheit. Post heating should be within the range of 1100 - 1200 Fahrenheit. Also SMAW(Coated Electrodes) should be stored in a warming oven to minimize moisture obsoption.

TESTING

- Welded Assembly should be NDT inspected with dye penetrant, fluorescent penetrant or magnetic particle techniques. Any 1/16" or larger defect should be repaired and inspected.

Special Features Of Mansons Camshaft Tubes

- High quality seamless tubing or high density poly propelene.
- Extends camshaft life for trailers subjected to extreme operating conditions.
- Includes grease fitting - Camshafts last longer as tube holds more grease.

Manufacturers part numbers and name are for cross reference purpose only and do not imply anything about the origin or manufacture of the product

TYPE 1

FEATURES

- Long life lubricating property.
- More inert and stable than petroleum greases.
- Retain viscocity at - 30 degree celsius
- Highly economical.
- Non-corrosive and water resistant.
- Excellent shear stability and reduces noise level.
- Contain additives for extreme pressure condition.

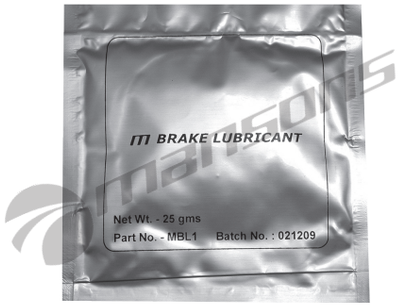
CHARACTERISTICS

TEST	M ETHODS	SPECIFICATIONS
Colour	Visual	Greenish
Base	------	Lithium complex
Base oil	-------	Mineral
NLGI Grade	ASTM D- 1092	2, Lx PEP 2
Presentation Unworked	ASTM D- 217	265-295
Dropping point	ASTM D- 2265	Min 250° C
Copper strip corrosion	ASTM D- 130	1a
Viscosity Index	ASTM D- 130	95
Operating Temp. Range		-30 to 200° C

APPLICATION

- Mining and construction vehicles working under wet and dusty condition.
- Specialized grease for working bearing particularly wheel hub application under heavy load
- Centralized lubrication

MANSONS #	TYPE	PACKING	APPLICATION
MBL2	1	Tube 230 gms	Grease brake lubricant



TYPE 2

FEATURES

- Long life lubricating property.
- More inert and stable than petroleum greases.
- Non-corrosive and water resistant.
- Excellent shear stability and reduces noise level.
- Excellent EP & Anti corrosive property.

CHARACTERISTICS

TEST	M ETHODS	SPECIFICATIONS
Colour	Visual	Greenish
Base	Visual	Lithium
Base oil	-------	Mineral
NLGI Grade	-------	3
Presentation Unworked	ASTM D- 1092	220-250
Presentation Unworked	ASTM D- 217	220-250
Dropping point	ASTM D- 217	Min 190° C
Operating Temp. Range	ASTM D- 2265	UP TO 170° C

APPLICATION

- A general purpose grease for bearings. Mechanica brakes and control cables.
- Mining and construction vehicles working under wet and dusty condition.
